DETAILED ACTION

Double Patenting

1. Applicant is advised that should claim 1 be found allowable, claim 6 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 2, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by US20020134855.

US20020134855 discloses a fluid injector comprising all the featured elements of the instant invention, note specifically a housing 14; a valve body/cartridge with needle 40; actuator 100; hollow body forming first spring rest 50; valve cap 17 with second spring rest, see Figure 1; sealing element 60; and spring 48. Note that the valve cap 17 is fixedly connected to the housing 14. The recitation of lines 11-16 in claims 1 and 6, are considered product-by-process

Art Unit: 3752

limitations and therefore, the apparatus of US20020134855 meets the limitations as currently recited.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 3-5, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over US20020134855 in view of Minoura et al.

US20020134855 discloses all the featured elements of the instant invention except for a second sealing element between the housing and the valve cap and a threaded connection between the valve cap and the housing. Minoura et al discloses a fluid injector with seals between valve cap 11a and the cartridge 14 and between the valve cap 11a and the housing 11b/12. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a seal between the housing and the valve cap, as taught by Minoura et al, since such a modification would ensure a proper seal between the two elements when they are connected. As to providing a threaded connection between the valve cap and the housing, such a fixing connection is well known in the fuel injector art and the apparatus of US20020134855 would be capable of having the vale cap and housing fixedly connected by a threaded connection.

Art Unit: 3752

As to claim 5, the apparatus of US20020134855, discloses all the featured elements of the claim and would be capable of being calibrated when the valve cap is fixedly connected to the housing.

Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kokubo et al discloses a fluid injector with valve cap encompassing a cartridge connected to a housing.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEVEN J. GANEY whose telephone number is (571)272-4899. The examiner can normally be reached on 9:00-5:00; Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Len Tran can be reached on 571-272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
